## **DETAILED ACTION**

### ***Continued Examination Under 37 CFR 1.114***

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 10/27/2004 has been entered.

### ***Response to Amendment***

2. This Office action is in response to the amendment filed 9/7/2004.

### ***Claim Rejections - 35 USC § 102***

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

4. Claims 6-8, 23, 26-28, 34, 38 are rejected under 35 U.S.C. 102(e) as being anticipated by Mandalia (US PAT. 6,636,890).

Art Unit: 2643

Regarding claim 23, Mandalia discloses a method of communicating with a mail center, i.e., Internet mail sever (50, figure 2) comprising running an email application on a receiver (74, figure 4), wherein the receiver is a receiver of broadcast signals and displaying with the receiver by means of the email application an email notification received in a broadcast signal at said receiver (col. 3 line 48 through col. 4 line 61).

Regarding claims 6-8, Mandalia discloses to store information relating to e-mail accounts at a central location, wherein information relating to e-mail accounts is linked to identifiers of receivers and smart card numbers of the receiver, and wherein the broadcast signal is part of a subscription service and information relating to e-mail account is linked to information relating to the subscription service (col. 4 lines 19-23 and lines 44-60).

Regarding claim 16, Mandalia discloses the broadcast signal being input from the Internet mail server (col. 4 lines 1-2) so that the broadcast signal is a digital data stream.

Regarding claims 26-28, the limitations of the claims are rejected as the same reasons set forth in claims 6-8.

Regarding claim 34, the limitations of the claim are rejected as the same reasons set forth in claim 16.

Regarding claim 38, the limitations of the claims are rejected as the same reasons set forth in claim 23.

Regarding claim 49, Mandalia discloses the broadcast being via cable or optical fiber (col. 3 lines 48-56).

Regarding claim 50, Mandalia discloses the email being sent without any prompt (col. 4 lines 42-61).

Art Unit: 2643

Regarding claim 52, the limitations of the claim are rejected as the same reasons set forth in claim 49.

Regarding claim 53, the limitations of the claim are rejected as the same reasons set forth in claim 50.

***Claim Rejections - 35 USC § 103***

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. Claims 17-18 and 35-36 are rejected under 35 U.S.C. 103(a) as being unpatentable over Mandalia (US PAT. 6,636,890) in view of Uchida et al. (US PAT. 6,327,610 hereinafter Uchida).

Regarding claims 17-18, Mandalia differs from the claimed invention in not specifically teaching the notification being sent as a section of the digital data stream by way of an entitlement management message. However, Uchida teaches a broadcast communication system for sending a portion of electronic mails with an access code, i.e., a notification, to an accepting station prior to transmission of a main body of electronic mail in order to prevent enormous traffic from concentrating on a part of a network at the time of data transmission (col. 6 line 62 through col. 9 line 13). Therefore, it would have been obvious to a person of ordinary skill in the art at the time the invention was made to modify Mandalia in having the notification being sent

Art Unit: 2643

as a section of the digital data stream by way of an entitlement management message, as per teaching of Uchida, because it prevents enormous traffic from concentrating on a part of a network at the time of data transmission.

Regarding claims 35-36, the limitations of the claims are rejected as the same reasons set forth in claims 17-18.

7. Claims 51 and 54 are rejected under 35 U.S.C. 103(a) as being unpatentable over Mandalia (US PAT. 6,636,890) in view of Bosco (US PAT. 6,335,963).

Regarding claim 51, Mandalia differs from the claimed invention in not specifically teaching to request by the receiver for broadcast notification from the mail center of waiting emails. However, it is old and notoriously well known in the art of a user sending a request to the mail center for broadcast notification of waiting mails by registering the user with an e-mail service to be notified of a received e-mail, for example see Bosco (abstract and col. 3 line 41 through col. 4 line 64). Therefore, it would have been obvious to a person of ordinary skill in the art at the time the invention was made to modify Mandalia in having requesting by the receiver for broadcast notification from the mail center of waiting emails, as per teaching of Bosco, in order to make user friendly of requesting e-mail notification service based upon user needs.

Regarding claim 54, the limitations of the claim are rejected as the same reasons set forth in claim 51.

Art Unit: 2643

***Response to Arguments***

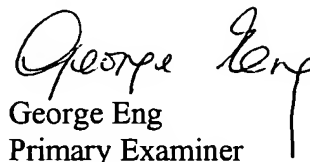

8. Applicant's arguments with respect to claims 6-8,16-18,23,26-28,34-36,38 and 49-54 have been considered but are moot in view of the new ground(s) of rejection.
